Alphabetized order of the syllabary published by Samuel A. Worcester in the first edition of the first volume of the Cherokee Phoenix on February 21st, 1828. In the article presenting the alphabetized syllabary, Worcester presents Sequoyah's (B V O) original order for the syllabary. The meaning of Sequoyah's order has been lost although there is some contemporary research on the topic. Sequoyah did not know the English language alphabet so he did not use it to order the presentation of the Cherokee writing symbols.
